

R - 360

GRAPPLE

The Sneller R- 360 grapple has a **rigid wrist**, and **360 deg. Continuous rotation**. These features allow accurate placement of the grapple and the ability to hold items at any angle.

Efficiency and precision were joined as one to make the R-360 one high production attachment. Whether its sorting limbs from logs, Or feeding a chipper, grinder, or log truck.

* optional hydraulic powered chain saw can be added for even more **Productivity**

Unlike double cylinder grapples. the R-360 single cylinder lever action brings material into a better cutting position like most traditional log grapples .

The Large Helping Hand Your Operation Needs

With A **Sneller R-360 Saw grapple** on your job, not only will your jobs run smoother and faster , but can also be safer by removing a hand cutter out of the way of harm . So if your **stacking ,loading , feeding or sorting** . The **R360** is the right tool for your daily operation.

The R-360 can be attached to an array of excavators from sizes 160 and larger. Pin on or other Hyd. grabbers can be used to attach this **powerful tool** to an excavator.
